

Success with 2009 IECC in South Carolina:
Tech Tips for Builders

FOUNDATION

TECH TIPS: FOUNDATION

Success with 2009 IECC in South Carolina for Builders

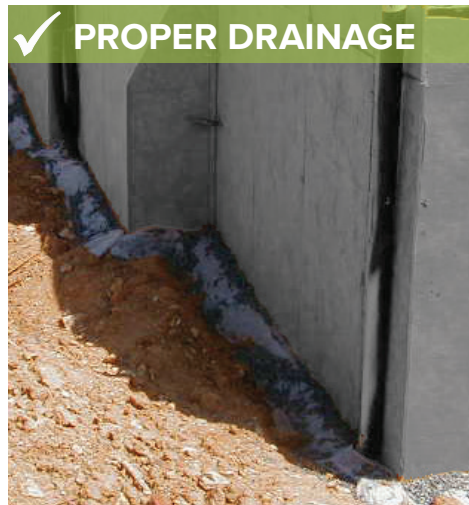

1. If installing poly sheeting, install at least 6-mil thickness and overlap at least 6 inches.

2. Damp proof the exterior of all below-grade walls.

3. Install a drainage system along entire foundation footing of below-grade walls.

4. Install exterior insulation without gaps, voids, misalignments or compression and with a rigid, opaque and weather-resistant protective covering.
