

Success with 2009 IECC in Georgia:
Tech Tips for Builders

FOUNDATION

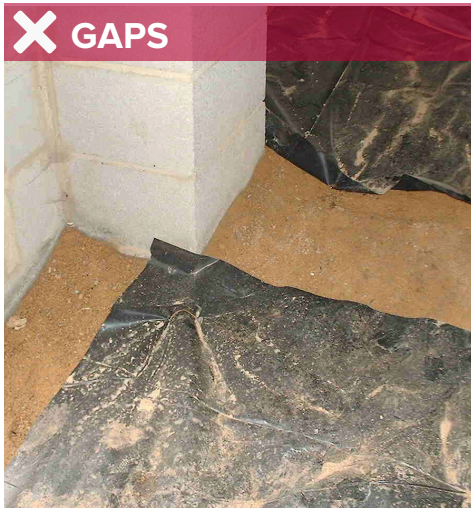

TECH TIPS: FOUNDATION

Success with 2009 IECC in Georgia for Builders

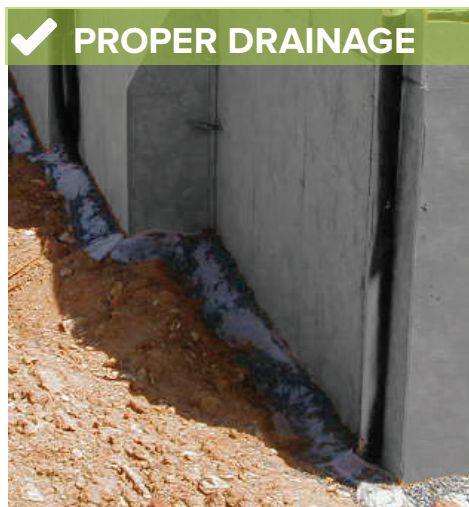

1. For crawl spaces, install poly sheeting that is at least 6-mil thickness and overlaps at least 6 inches.

2. Damp proof the exterior of all below-grade walls.

3. Install a drainage system along entire foundation footing of below-grade walls.

4. For heated slabs, install exterior slab insulation without gaps, voids, misalignments or compression and with a rigid, opaque and weather-resistant protective covering.
