FOUNDATION

TECH TIPS: FOUNDATION

Success with 2012 IECC for Builders

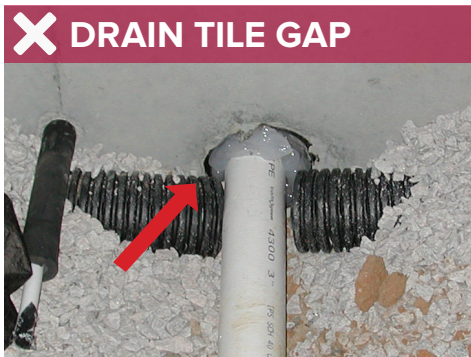

1. For crawlspaces, install 6-mil poly sheeting to overlap and extend up foundation walls at least 6 inches.

2. Damp proof the exterior of all below-grade walls.

3. Install a drainage system along entire foundation footing of below-grade walls.

4. For exterior insulation, install without gaps, voids, misalignment or compression and with a rigid, opaque and weather resistant protective covering.
